## Message from the President

On behalf of the Plant Growth Regulation Society of America, we are pleased to offer you to the *Proceedings of the 33rd Annual Meeting of the Plant Growth Regulation Society of America*.

The program for this year's conference featured presentations over a wide range of topics focusing on current trends in plant growth regulation. Over 100 attendees participated from over 10 different countries, presenting impressive research on both basic and applied science.

Program elements such as the poster session, the industry update session, the business meeting, and the conference excursions gave everyone ample opportunity to network with colleagues and friends, both old and new, as well as experience fine Quebec City cuisine and culture.

We hope you enjoyed the 2006 conference and your time in Quebec City, Canada. For those of you who were not able to attend, we hope you enjoy this compilation of the research presentations and we invite you to join us for future meetings. You will be most welcome!

Thank you for your interest.

Most Sincerely,

Jeff Norrie,  
PGRSA President
